

Twin-flowered Agave

Agave geminiflora

Plant Height: 3 feet

Flower Height: 10 feet

Spread: 3 feet

Sunlight:

Hardiness Zone: 9a

Other Names: Century Plant

Description:

This unusual variety has very narrow, dark green leaves that are spineless and flexible, set in a dense rosette; towering spikes with yellow flowers when rosettes mature; a great visual accent for indoor planters in bright locations

Features & Attributes

Twin-flowered Agave features bold spikes of yellow pincushion flowers rising above the foliage from late summer to early fall. Its attractive succulent narrow leaves remain green in color throughout the year.

This is a multi-stemmed evergreen houseplant with an upright spreading habit of growth. Its relatively coarse texture stands it apart from other indoor plants with finer foliage. This plant usually looks its best without pruning, although it will tolerate pruning.

Planting & Growing

When grown indoors, Twin-flowered Agave can be expected to grow to be about 3 feet tall at maturity extending to 10 feet tall with the flowers, with a spread of 3 feet. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 10 years. This houseplant will do well in a location that gets either direct or indirect sunlight, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It prefers dry to average moisture levels with very well-drained soil, and may die if left in standing water for any length of time. This plant should be watered when the surface of the soil gets dry, and will need watering approximately once each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil pH, but grows best in poor soil. Contact the store for specific recommendations on pre-mixed potting soil for this plant.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.

-- THIS IS A HOUSEPLANT AND IS NOT MEANT TO SURVIVE THE WINTER OUTDOORS IN OUR CLIMATE --
