

Blue Billow Hydrangea

Hydrangea serrata 'Blue Billow'

Height: 4 feet

Spread: 6 feet

Sunlight:

Hardiness Zone: 5b

Other Names: Mountain Hydrangea

Description:

A beautiful rounded shrub that features showy light blue lacecap flowers for several weeks that change to stunning crimson as they age; leaves are tinged with burgundy in the fall; a wonderful choice for the flower garden or border

Ornamental Features

Blue Billow Hydrangea features bold sky blue lacecap flowers at the ends of the branches from early to mid summer. The flowers are excellent for cutting. It has dark green deciduous foliage. The pointy leaves turn an outstanding burgundy in the fall.

Landscape Attributes

Blue Billow Hydrangea is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This is a relatively low maintenance shrub, and should only be pruned after flowering to avoid removing any of the current season's flowers. It has no significant negative characteristics.

Blue Billow Hydrangea is recommended for the following landscape applications;

- Accent
- Mass Planting
- General Garden Use

Planting & Growing

Blue Billow Hydrangea will grow to be about 4 feet tall at maturity, with a spread of 6 feet. It has a low canopy. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub does best in partial shade to shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type, but has a definite preference for acidic soils. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This is a selected variety of a species not originally from North America.
